

The Vulcan X2 security grille is a retractable design with Loss Prevention Certification Board and 'Secured by Design' accreditation. It is strong enough to resist a determined attack using bolt cutters, and has also undergone bomb blast mitigation tests.

LPS1175: Issue 7 SR2

Applications

This LPCB grille is certified to LPS 1175 Issue 7 Security Rating 2, making it ideal for a wide range of applications. It is a popular choice for high security situations which do not require UK Government approval.

Standard Features

- Enhanced multi-point locking
- Bolt cutter resistant
- Successfully bomb blast tested
- Maintenance free
- No visible rivets
- High build quality with an aesthetically pleasing design.

Security Accreditation

- Certified to LPS 1175 Security Rating 2
- Insurance approved by Police Preferred Specification 'Secured by Design'
- Approved by the Association of British Insurers

Bomb Blast Mitigation

One of the few security grilles which can withstand a 100 Kg charge at 20 metres, when used in conjunction with glass with an anti-shatter film. Grille will maintain intact after such an incident, preventing looting and providing an emergency exit.
